

How the Shrub Department is laid out

Much of the nursery shrubs and trees are arranged to help you shop. You will notice signs in the main areas showing which are the low growing shrubs, which are mid sized shrubs and which are the large background or privacy shrubs.

The trees are clearly marked so you can tell which are small medium or large size trees. In these areas the plants are basically arranged by botanical names.

You may note that some types plants may be in two or three areas because different varieties grow to different sizes. For example Heavenly Bamboo and Indian Hawthorn varieties will show up in the low shrubs and in the mid sized shrubs.

You will see our shade plant selection in the second and third tent. The entry tent shows both shade and sun plants for display reasons.
